Claim Rejections - 35 USC § 112

Claims 1-75 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "any rod" is ambiguous. For example, the sleeve is not capable of accommodating a rod larger in diameter than the sleeve.

Claims 1-75 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Brien in view of Shukat et al.

O'Brien discloses a panel that is supported from a rod by way of either a continuous sleeve 52 or 48, by tabs 66, or by rings 94. Also provided are spaced guide elements 26 which guide pull cords 60 or 88. The panel is made of cotton fabric, column 3, line 58. The synthetic fabric of claim 7 is not chosen, thereby obviating the limitation of claim 9, etc. The use of the panel, i.e. room divider, wall hanging, etc., is a functional recitation that does not limit the structure of the device. The size of the panel is obvious depending on the size of the opening it is intended to cover. What is not shown by O'Brien are the slats, or the equivalent thereto, dowels. However, such are well known in the art, as illustrated by Shukat at 52. It would have been obvious to modify O'Brien to have such slats so as to provide defined pleats. See Fig. 5 in Shukat et al which illustrates the accumulated configuration of the panel.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. Applicant remarks concerning the alleged subcombination of O'Brien regarding the "collateral hardware" are not fully understood. Applicant states, on page 15, that his panel is to be supported by a "conventional curtain rod". O'Brien states that his panel is supported by "conventional curtain rod 82 or 84", column 6, line 44. Regarding the combination of Shukat et al with O'Brien, there are several features of O'Brien other than potential ballooning or scalloped shapes. Primarily, O'Brien is a raisable panel that can be mounted on conventional curtain rods. Modifying O'Brien to have slats does not limit this feature, or many other features, of O'Brien. Modifying a primary reference always changes its structure but may still be a valid modification.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
